

Miracle Dinghy Sails

There are several suppliers of sails for the Miracle with varying prices and deals. Some of the best known suppliers of sails in the Miracle fleet are listed below.

When purchasing new sails it is possible to specify the type of cut you require.

3 cuts used today are:

1. Panel (horizontal panels)
2. Radial (as seen by Sail Register below)
3. Half Radial (usually the lower half radial and the top half panel cut)

The cut you choose will determine the final shape and fullness of the sail depending on which leg of the course you want to maximise performance.

For detailed professional advice on sails you can contact one of the following suppliers.
